DATA CENTRE INTERCONNECT (DCI)

X86's Data Centre Interconnect (DCI) service is purpose-built connectivity solution to keep your mission critical infrastructure seamlessly connected, locally and globally. We deliver high performance, low-latency connectivity that empowers your business to scale, adapt, and thrive in a digital first world

Powered by a next-generation, self-healing network with coherent optics of DWDM technology, X86 DCI enables direct, point-to-point links between our global Points of Presence (PoPs). Connect effortlessly to over 100 data centres worldwide, cloud providers, peering exchanges, and both domestic and international carriers, all through a single, resilient platform.

With bandwidth options up to multiple 100Gbps, our DCI offers the flexibility to match your evolving needs, whether you're expanding, optimizing, or transforming operations. Our customers benefit from competitive rates, fast provisioning (next-business day*), and the efficiency of scale through our deep interconnects with top-tier carriers.

- Diverse, fully redundant path between Data Centre PoPs
- Next Business-Day activation for domestic on-net location
- 24x7 NOC management manned by network service engineers
- Highly scalable for bandwidth on demand upgrades

DEDICATED INTERNET ACCESS (DIA)

Experience consistent, high-performance connectivity with X86's Dedicated Internet Access (DIA) a fully dedicated, enterprise-grade service that delivers guaranteed bandwidth, low latency, and 24/7 reliability. Unlike shared connections, our DIA ensures your business gets uncontended internet access at all times, ideal for mission-critical operations, cloud applications, video conferencing, and real-time data exchange. Backed by robust SLAs and direct peering with global carriers, X86 DIA keeps your business online, optimized, and ahead of the curve.

Fast & Reliable Connectivity

Blazing-fast, dedicated internet built for what matters—crystal-clear video calls, seamless file transfers, and smooth, secure online transactions.

Cost Effective Pricing

Unlock exceptional value without breaking the bank. Our cost-effective pricing delivers the quality you need at a price that makes sense.

Flexible Contract

Experience peace of mind with a contract that works for you, not againts you. Our flexible options ensure you're always in control of your agreement.

24x7 Support

No matter when you need us, we're just a click or call away. Our 24-hour support provides reliable assistance whenever it's most convenient for you.

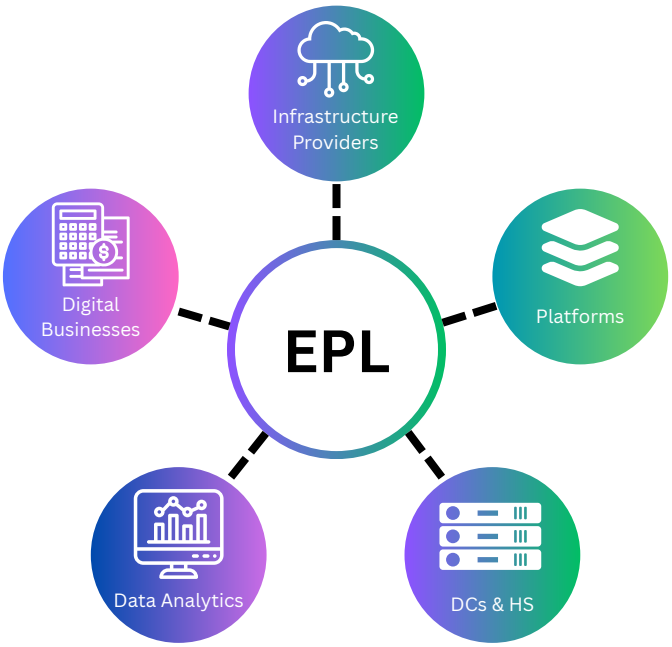
ETHERNET PRIVATE LINE (EPL)



X86's EPL offers effortless scalability of your network with dedicated, Layer 2 point-to-point and point-to-multipoint connections.

It delivers protected, high-capacity metro, regional or international connections between X86 or partner network endpoints, while removing the security and performance risks of the public Internet.

100Mbps to 100Gbps

Bandwidth available across 1GE to 100GE ports

9000 bytes

Maximum transmission unit (MTU) packet size

30 markets

With a strong global presence and 15 in APAC

33 subsea cables

Integrated into our global backbone for route optionality
